

Matias Ezequiel Galarza Fernandez

Senior Game Developer · Lead Programmer — Multiplayer · VR/XR · Cross-Platform Tooling · AI Integration

Greater Buenos Aires, Argentina (UTC-3) | lobinuxsoft@gmail.com | [Teléfono]

LinkedIn: [linkedin.com/in/lobinux](https://www.linkedin.com/in/lobinux) | GitHub: github.com/lobinuxsoft

PROFESSIONAL SUMMARY

Senior game developer and lead programmer with 9+ years building games, real-time multiplayer systems, and cross-platform developer tools. Currently shaping next-generation VR multiplayer experiences at 3dar, an Argentine studio with AAA cinematic and HBO immersive credits. Previously co-founded an EdTech game studio, where I led engineering and shipped five educational titles. Combines game-industry rigor, real-time constraints, deterministic simulation, hardware and thermal budgets, with modern Rust desktop tooling. Strong advocate of clean architecture, SOLID principles, measurable performance, and production-grade code, with experience leading prototypes from concept to shippable product.

TECHNICAL SKILLS

Game Engines: Unity (C#, C++), Unreal Engine (C++), Godot 4 (GDScript, C++ GDExtension)

Languages: C#, C++, Rust, GDScript, Python, .NET / .NET Core, JavaScript / TypeScript

Multiplayer & Networking: Photon Quantum (ECS, deterministic simulation), WebSocket, TCP, mDNS, custom protocols, .NET Core game servers

VR / XR: Meta Quest, immersive interaction design, performance & thermal optimization

Cross-Platform Tooling: Rust + Tauri 2 desktop apps, Decky Loader (Steam Deck) plugins, SolidJS

AI Integration: Local LLM inference (llama.cpp via C++ GDExtension), prompt engineering for NPC dialogue, generative AI

Platforms: Steam Deck, Linux handhelds, Windows, Android / mobile, VR headsets

Practices & Tools: SOLID, design patterns, clean architecture, Git, Agile, gameplay prototyping, developer tooling

Linux: Maintainer of a custom Arch-based distribution (yaguarete_os)

PROFESSIONAL EXPERIENCE

Senior Multiplayer Developer — 3dar

Mar 2024 – Present

Argentina (Remote)

- Develop next-generation VR multiplayer experiences for a studio with AAA cinematic and HBO immersive credits.
- Build deterministic real-time multiplayer using Photon Quantum (ECS), with custom networking over WebSocket, TCP, and mDNS.
- Optimize VR performance and thermal budgets for Meta Quest headsets to sustain target frame rates.

Co-Founder, Lead Programmer & Game Developer — DIGI Learnnials

Sep 2017 – Jan 2024

Argentina

- Co-founded an EdTech game studio and led engineering on five shipped educational titles.
- Built gameplay prototypes spanning diverse mechanics, and researched and integrated new technologies including multiplayer and API connectivity.
- Authored readable, scalable, production-grade code following SOLID principles, design patterns, and clean architecture.
- Created internal tools that accelerated project development across the team.

Founder & Game Developer — Lobinux

Mar 2017 – Sep 2019

Lomas de Zamora, Greater Buenos Aires, Argentina

- Developed video games and immersive VR experiences for mobile platforms, both independent and work-for-hire.
- Shipped Rugby Penalty Kicks for Vear Experience as a contracted VR project.

SELECTED OPEN-SOURCE PROJECTS

- **CapyDeploy** — Cross-platform game deployment for handheld devices. Hub / Agent architecture in Rust + Tauri with a WebSocket control channel and a separate TCP data channel; Decky Loader plugin in Python. Live in production.
- **OhMyDialogSystem** — AI-powered NPC dialogue for Godot 4. Local LLM inference via llama.cpp through a C++ GDExtension, with three dialogue modes (not a chatbot wrapper).
- **Chaja** — Git client in Rust + Tauri + SolidJS that flags common mistakes before they ship.
- **yaguarete_os** — Arch-based Linux distribution tuned for development workflows.

EDUCATION

Higher Technical Degree in Video Game Development — Image Campus Mar 2020 – Dec 2023

Junior Programmer — Game Design & Interactive Content — Image Campus 2016

Image & Sound Design (Visual Design & Communication) — University of Buenos Aires (UBA) 2006 – 2010

CERTIFICATIONS

- Unreal 5.0 C++ Developer: Learn C++ and Make Video Games
- Become a C++ Developer
- Learn C#
- C++: Smart Pointers
- Essential Foundations of Programming
